

MANUFACTURING

Swift Current is where the future of manufacturing is being made – and with so much to offer emerging and existing manufacturers, it's easy to see why.

GO FURTHER WITH MANUFACTURING

- Swift Current is home to a competitively priced industrial park with high capacity water, wastewater, power and natural gas services
- Swift Current's existing and emerging manufacturing industries include:
 - Natural resources exploration and production equipment
 - Agricultural machinery and value-added processing
 - Customized industrial equipment
 - Helium sector supply-chain components
 - Metering, pumping and dispensing systems
 - Renewable energy components
- Saskatchewan boasted \$16 billion in manufacturing sales for 2017 and projects \$25 billion in manufacturing sales for 2025
- 7% of Saskatchewan's GDP is from manufacturing
- Home to the lowest provincial corporate taxes in Canada
- Saskatchewan has one of Canada's fastest growing populations and future workforces
