

RENEWABLE ENERGY

With abundant sunshine, powerful winds and a surplus of available land, Swift Current is home to some of the best renewable energy opportunities on the planet.

POWER TOMORROW WITH RENEWABLE ENERGY

- Swift Current offers plentiful resources and insolation for solar farms, making it a globally competitive environment for photovoltaic enterprises
- Beyond energy generation, Swift Current offers opportunities across the renewable energy supply chain from component manufacturing to engineering
- Energy suppliers in Saskatchewan are responsible for 36% of Canada's primary energy production
- With federal support, Saskatchewan plans on using 50% renewable energy by 2030
- Provincial renewable energy incentives include:
 - 35% rebate for wind turbines 100 kW or less
 - 10% non-refundable tax credit for research and development
- Canada has the 3rd largest capacity for renewable energy in the world
- 65% of Canada's energy is renewable energy
- As the 6th largest consumer of electricity in the world, Canada offers a huge domestic market
